

MISSION

The Unions and Companies of the Pharmaceutical Industry Labor-Management Association recognize that a strong domestic pharmaceutical industry providing innovative, affordable medicines is vital to the American People and the Nation.

The Association resolves to:

Work together on legislative, regulatory and other key issues affecting the pharmaceutical industry and organized labor in the national interest;

Discuss areas where there is disagreement between the parties in a committed effort to find common ground and mutual benefit;

Investigate the issues affecting access to and affordability of medicines;

Focus on maintaining strong stateside employment and research leadership for the U.S. industry.
